INTRODUCTION

As a reader of this book, you are already joining the groups of men and women of goodwill everywhere looking for new ways to take their lives further. For such people, the next step is to enter the world of spiritual technology.

Your next step is to discover or upgrade the Third Eye, a universal secret known throughout history only to the most illumined minds. These illumined minds have flourished by learning and safeguarding the secrets of spirituality, universal wisdom laws and human energy science. Great figures like Leonardo da Vinci, Sir Isaac Newton and William Shakespeare, and groups like the Rosicrucians and the founding fathers of the United States of America, are said to have studied some of these secrets. One of the greatest secrets of all is the Third Eye.

As the world is now evolving more quickly, what has been held secret in the past is now being revealed to those who can wield power and leadership responsibly.

Are you one of this next generation of great ones who will discover the secret of the Third Eye to lead your life to its highest potential? This book on the Third Eye is written not only for current readers like you, but also for incoming generations who are the bridges from mystical to more scientific and technical cultures. The more advanced generations of the future will by-pass many of the obsolete step-by-step learning styles traditionally used by spiritual teachers and educators.

The current and incoming civilizations are fast learners and more advanced. They don't go for myths or dogmatic presentations of truth in the study of advanced philosophies. They want a more direct, systematic approach accompanied by applied experimental learning that combines principles with practicality.

XX THE THIRD EYE: A UNIVERSAL SECRET REVEALED

I hope that those who read and study this book will find more understanding and practical use of these esoteric teachings through the graphic illustrations of the Third Eye and the spiritual anatomy, created by highly trained spiritual practitioners. You won't find images like these anywhere else. These teachings are ahead of their time and represent an advanced perception, which is only possible with a highly-developed Third Eye.

Most of the past literature and books written about the Third Eye discuss one generic model and present it as the same make-up for different levels of human development. What makes this book different is that the Third Eye is classified and discussed as a spiritual technology with varying designs, models and refinement.

One of the most important roles of this book is to offer practical training to unfold your Third Eye safely and effectively. It also emphasizes the positive uses of the Third Eye for greater and higher service in line with each reader's level of personal development. After all, any tool – including the Third Eye – is as great as the benefits it contributes to the daily lives of those who use it as well as the lives they touch.

So what can your Third Eye do for you? Its benefits include:

- ◆ Power to manifest only good goals in your life
- ◆ A high grade of will-power to finish what you start faster
- ◆ 5 ascending levels of intelligences for more advanced decision making and problem-solving
- ◆ More developed intuition and wisdom to make you a pioneer and bring breakthrough ideas to the world
- ◆ A quantum leap in consciousness leading to achievable enlightenment in this life
- ◆ Sustainable internal stamina for higher productivity and better longevity
- ◆ A courageous, loving heart to expand the power of your service to make a world of difference

In **Chapters 1 to 4**, we will study internal factors affecting Third Eye development such as levels of human development, the 7 Rays of human temperament and your invisible energy anatomy. **Chapter 5** discusses the critical relationship between *kundalini* development and construction of the Third Eye. **Chapter 6** is dedicated to your advanced spiritual anatomy, which contributes greatly to the development and quality of your Third Eye. **Chapter 7** explores various spiritual tools that need to be developed in cooperation with your Third Eye and the do's and don'ts of their use. **Chapter 8** gives you specific techniques to construct and develop your Third Eye.

Chapter 9 discusses character building and 8 key virtues for self-mastery needed for safe development of the Third Eye powers, as well as for daily life. **Chapter 10** focuses on what you can do with your Third Eye in daily life. And, **Chapter 11** gives a vision of how humanity will use the Third Eye in the future.

My study and experiments with the Third Eye and its energy mechanism were inspired by my early mentors. Two of my mentors from Southeast Asia are masters of healing, meditation and the spiritual sciences. Another is a master of Zen, mantric yoga and martial arts, and the fourth mentor is an enlightened yogi-guru in the highlands of the Himalayas who is said to be an "immortal" and more than 400-years old.

Parallel to training with my physical spiritual teachers, I studied deeply the books of Alice Bailey and the Holy Master DK, the Theosophical Society and Dr. Douglas Baker, who wrote a book on the Third Eye.

The advanced esoteric teachings of Master DK through Alice Bailey's books are also an excellent reference on the philosophy of the Third Eye, especially *A Treatise on White Magic*, *A Treatise on Cosmic Fire*, *Esoteric Healing*, *Discipleship in the New Age, Volume II* and *Initiation, Human and Solar*.

In studying these books and receiving these trainings, I fully penetrated and understood the principles and workings of the Third Eye. Then as an esoteric scientist using my engineer's mind (the

XXII THE THIRD EYE: A UNIVERSAL SECRET REVEALED

result of my education and a decade of experience as a mechanical engineer), I translated these esoteric, abstract teachings into usable information and concrete illustrations that can be easily understood by most readers and spiritual students.

One of my aims with this book is to demystify the Third Eye in order to make it easy to learn and to reduce any blind spots and negative traps in its uses. With some of my trained clairvoyant students and co-workers, I intuitively “downloaded” the latest data and teachings about the Third Eye for this book.

My higher spiritual mentors, who are also the guides for this spiritual technology, were kind but also strict about the revelation of these secret teachings that only initiated Masters and advanced esoteric scientists are allowed to teach and handle for global evolution. I am truly grateful and blessed to be able to divulge and teach this spiritual technology to ready students, friends and co-workers on the Higher Path.

Welcome to this Path, and may you enjoy your advanced journey as you ascend to greater spiritual heights and service.

– Master Del Pe

THE THIRD EYE: A UNIVERSAL SECRET REVEALED

The Third Eye has long been treated as a mysterious secret of enlightenment guarded by advanced yogis and spiritual Sages. However, familiar symbols of the Third Eye are all around us. One of the most common is the eye at the top on the pyramid on the U. S. dollar bill. There are many other familiar symbols of the Third Eye that are “hidden in plain sight” in religions and cultures.

Clairvoyants, authors and artists have created symbols of the Third Eye as well. These include C. W. Leadbeater, Dr. Douglas Baker and Master MCN. While many may think knowledge of the Third Eye only happens at some mysterious door of Spiritual Initiation, the Third Eye is actually a known universal “secret.” But most spiritual practitioners have yet to unfold and experience this powerful spiritual technology.

This book takes the mystery out of the Third Eye and guides you to develop your Third Eye gradually and systematically. It also focuses on how to use your Third Eye as a practical tool for higher service as well as for enlightenment.

WHAT IS THE THIRD EYE?

The Third Eye is a marvel of spiritual technological advancement with many tools in one. It is like the “Swiss Army knife” of human energy anatomy. The term “spiritual technology” denotes the fact that inner scientific and systematic uses of the Third Eye are governed by esoteric science, spiritual laws, principles and applications.

The Third Eye acts as a fast spiritual modem, high-speed computer, high-tech communications, seeing and photographing equipment. It is also a spiritual telescope and microscope to view macrocosmic and microcosmic data with infinitesimal detail.

The Third Eye has started to become a familiar term in esoteric or spiritual circles, but few understand what it really is, where it really is or how to develop and use it effectively for higher service. Most often, it is misconstrued as the *Ajna Chakra* (see Chapter 4) or the forehead. It is actually formed by more than one *chakra*.

Most Ancient Wisdom teachings and books like those by Alice Bailey, Dr. Douglas Baker and Dr. T. Lobsang Rampa have also touched on the subject. In India, China and other Eastern countries, several spiritual traditions, especially those hidden from public scrutiny, have long taught Third Eye practices through word-of-mouth from teacher to disciple.

To my knowledge (as of 2006), no one has evaluated this mechanism in a complete, coherent system through technical diagrams to explain its progressive growth and models. So only a few disciples have consciously developed the Third Eye to its maximum potential. This is similar to the early days of computers when only a few scientists used them. The Third Eye is a complex and sophisticated technology so illustrating its structure, components and processes makes it easier to grasp, develop and use it.

WHAT INFLUENCES THIRD EYE DEVELOPMENT?

Several factors influence or affect the development of the Third Eye. To unfold and use your Third Eye properly, you will need to be familiar with all of them as follows:

6 THE THIRD EYE: A UNIVERSAL SECRET REVEALED

SEVEN LEVELS OF HUMAN DEVELOPMENT

There are at least seven stages a person passes through on the universal path of human evolution. At some stages, the Third Eye and the “human energy centers” or *chakras* (see Chapter 4) that help form it are not yet developed. The size, design and intensity of the Third Eye is affected by a person’s level of Initiation and spiritual development.

SEVEN TYPES OF HUMAN DESIGN AND TEMPERAMENT

There are at least seven different types of human temperament with their unique strengths, weaknesses, preferences, life purposes and work. The Third Eye of each type has a different design due to the seven different predisposed purposes, work and energies. These seven types of temperament are referred to as the “Seven Rays of Creation” in Universal Wisdom (see glossary) teachings.

COSMIC CHANGES: PISCAN TO AQUARIAN LIFE

Different periods in world evolution have a big impact on human evolution because of the different Divine energies, qualities and impulses shaping each period. The current Piscean period (see glossary), which is finishing up, is characterized by abstract devotion, idealism and emotional upheavals. This has triggered certain patterns of energy that result in different qualities and designs of the Piscean Third Eye (coily, circular) compared to the new incoming Aquarian Life (see glossary) Third Eye design (geometrical and diamond shaped). The characteristics of the new period, which is more scientific and concrete, influence and reshape the Third Eye designs.

This time of cosmic change from the Piscean to Aquarian Life period, which is happening especially through 2010, is called the “Period of Transition in the New Age.” The Third Eye is a spiritual, invisible tool in your head that is currently being upgraded to use different “currents and voltages” of available spiritual energy. It is like an engine being converted from diesel to gasoline or lines of communication from analog to digital.

YOUR SPIRITUAL ANATOMY

Most past spiritual teachings describe the spiritual anatomy – the *chakras*, Spirit, Soul and personality – in words rather than illustrations. This book provides pioneering drawings, sketches and schematics that have never been seen by the general public before to illustrate different components of your spiritual anatomy as well as the different models of the Third Eye.

YOUR SACRED FIRE, KUNDALINI, AND ITS MODELS

Universal Wisdom philosophies and metaphysical schools teach the “sacred fire” or life force called the “*kundalini*” (see glossary), which is a fuel for human sexuality, creativity, spiritual development and eventually enlightenment. The *kundalini* also acts as a critical fuel in the building and use of the Third Eye, so you cannot develop the Third Eye fully without activating your *kundalini*.

YOUR SOUL AND SPIRIT

Any study of the Third Eye is incomplete without a thorough understanding of the components of human development, nature and energy anatomy, including the Soul and Spirit. The Third Eye has always been a key ingredient in the spiritual development of Masters. With the Piscean to Aquarian Life changes that are happening now and the associated shift from Piscean to a more scientific, objective Aquarian approach, the Third Eye is more important than ever as a spiritual tool and technology to perceive higher truth, eliminate life's obstacles and be of higher service. It also equips you with more discrimination, penetration of new truths and multi-dimensionality. These important influences are discussed in more detail in Chapter 2.

HOW CAN YOUR THIRD EYE BE USED?

Truth has many layers depending on your level of human development. As you will learn in later chapters, most people operate on a very emotional level of truth with their perceptions and reactions colored by whether they are in a good or bad mood. As a person becomes more evolved from a ordinary human being or masses

8 THE THIRD EYE: A UNIVERSAL SECRET REVEALED

level to the intelligentsia level, perception of truth becomes more mental, colored by ideas, education, philosophies and ideals.

Beyond intellect lies wisdom, and its source comes from what the Sages and wise people of history call the “spiritual planes of existence.” It is these higher planes of “higher truth” that the Third Eye can penetrate and perceive. To reach these planes, the Third Eye acts as an “esoteric telescope” to look at and esoterically penetrate the higher truths and purpose of life and existence. It serves as a searchlight to intuit and apprehend higher principles of life and universality. Just like a telescope, it can peek farther into the higher expanses of the esoteric aspects of the universe.

The Third Eye tool not only looks at physical or abstract information, it understands the entire meaning, implications and applications of gathered principles or data instantly! It enables access to tremendous amounts of higher information and truths instantaneously, which most people need hundreds of lives to comprehend.

On the opposite end of the spectrum, it is an esoteric microscope which is able to see and pierce into the minute data of life and substance. The microscopic function of the Third Eye can tune into deeper origins and history.

As with scientists, differing interpretations of data and gaps in interpretation exist between mystical and esoterically-trained seers who use their Third Eye to view beyond the present time or the physical world at abstract or unknown levels. Esoterically-trained Third Eye seers instantly understand and can interpret and describe even the most unknown, never-before-experienced data whereas mystical seers often cannot describe or interpret what they are seeing. Thus the need for deeper esoteric schooling and inner education.

In this book, inner seeing with the Third Eye does not mean clairvoyance or psychic faculties. The Third Eye is superior to psychic faculties. A psychic's perception can be negatively affected if the seer's own *chakras* or auras (see glossary) are dirty or if they are working in an energetically contaminated location.

When this happens, the perceived data will be inaccurate or negatively tainted. It is like looking through warped glass or a dirty win-

dow; the real landscape won't be perceived properly. Psychics can also be biased according to their culture, religion or training.

With Third Eye use, there are fewer chances of misinterpretation of data, especially by those who are esoterically-trained because the Third Eye is a more sophisticated technology than just using *chakras* or auras, which can be contaminated by the environment or the seer's own issues.

The Third Eye as an advanced invisible spiritual tool found at higher frequencies of a person's energy system, is less affected by the lower planes of daily physical existence. Several factors affect which levels of truth are accessible through the Third Eye's telescopic and microscopic functions. These include the depth of esoteric training and the spiritual development of the practitioner, all of which we will discuss in detail.

To develop the Third Eye properly, you will be given guidance to awaken *chakras* in the head, heart and lower energy system below the solar plexus area that affect the sacred fire, *kundalini*. Although all the *chakras* must be purified, energized and activated, these particular *chakras* are of major importance.

Future scientists and physicists who have developed their Third Eye will perceive information way ahead of their colleagues who lack Third Eye development. Modes of research and education will change dramatically when humanity has developed this inner seeing mechanism.

This book is dedicated to advancing and accelerating Third Eye development to meet current and future world needs. With safe and effective procedures to construct and develop this advanced spiritual technology and tool, humanity will progress faster with better solutions to increasingly complex personal, professional, social and global problems.

With the Third Eye, leaders and citizens alike will be able to:

- ♦ Understand the real reasons and purpose behind seemingly negative or inexplicable phenomena like natural disasters or wars
- ♦ Immediately identify positive or negative political candidates and leaders using higher discrimination

10 THE THIRD EYE: A UNIVERSAL SECRET REVEALED

- ♦ Esoterically see and heal diseases developing in a person before they manifest physically
- ♦ Know the reality of the “inner world” and the true nature of death as a liberation, graduation and continuation of life
- ♦ Perceive the true facts of reincarnation and karma
- ♦ Know and implement one's unique life purpose at a younger age, thus avoiding many years of wasted activity or a sense of being lost
- ♦ Navigate what are sometimes turbulent financial, political, personal, social and other changes as we move through the transition from the Piscean to the Aquarian era

“A lot of positive change has come into my life as a professional after having completed the Mastering Your Third Eye Program with Master Del Pe. My power to manifest my goals, both personal and professional, has increased many fold. I have developed more intuition and the ability to understand things that are not normally said in words.

“This immensely helps me in decision- making in my life, be it at my work or my home. I have grown as an individual as a whole and am able to implement new tools to achieve higher growth in my life, which was not possible before.

“The struggle to make things work has simply vanished from my life. I have grown by leaps and bounds. The so- called quantum leap has been experienced by me over the past 3 years.”
